Subject: Vacancy Notice

Dear Hiring manager,

I'm reaching out to express interest in any development opportunities you may have available. I've been working as a developer for several years, gaining experience in building, maintaining, and improving web applications across different stacks.

I'm comfortable working across the backend and frontend, and have worked with languages like Python, JavaScript, and frameworks such as Flask, Django, and React. I enjoy solving problems and figuring out how things work, whether that's optimizing a query or tracking down a tricky bug.

In previous teams, I've been someone who others rely on when things get complicated or need to be done reliably. I prefer clear communication, asking questions when needed, and being straightforward when something's off. I've worked with teams of all sizes ,from small groups to larger cross-functional teams and I'm someone who listens and adjusts to how others like to work.

I'm open to both contract and permanent roles and would be glad to share more about what I've worked on or help where there's a gap that needs filling.

Thanks for taking the time to read this ,I've attached my CV and am happy to chat if anything comes up.

Sincerely

Fouzai M Amine
